

EXPERIENCE

CIBC | BUSINESS SYSTEMS ANALYST

May 2020 – Aug 2020

Analyzed workload distributions by manager and line of business using *Tableau* and *Python*. Formulated *Tableau* dashboards for presentation to senior executives. Created a *Python* program to automate identification of erroneous input in excel sheet listing active projects. Collaborated with agile developer team through JIRA and Confluence. Led team to build a program that scrapes special offers from banks using *BeautifulSoup* and formatted them in an excel spreadsheet.

CIBC | TECHNOLOGY SYSTEMS ANALYST

May 2019 – Aug 2019

Tested computer software in CIBC laptop and desktop devices. Assisted the Desktop Imaging team in testing updates before their release by running intermediate versions of the updates on devices. Communicated test result logs to developers.

PROJECTS

Check out my github or website to see these and more!

🔗 STOCK INFO GENERATOR

Python program takes a spreadsheet of 50+ stock tickers and outputs a spreadsheet of info including price, volume, ratings, and more. Plots price history and dividend data. Info is scraped from Yahoo Finance then processed using *pandas*, *openpyxl*, *StyleFrame*. Additional *macros* like live currency conversion.

🔗 AMPL-SQL PROFIT MODEL

AMPL program extracts product, material, machine, and other data from *Access* using *SQL* to build a profit model. Using the data, an optimized profit production plan with reduced cost of variables, shadow prices, and binding constraints is outputted.
