

EXPERIENCE

CIBC | BUSINESS SYSTEMS ANALYST

May 2022 0 – Aug 2020

Data analysis using python libraries (pandas, numpy, etc.), Excel, Tableau, Access. Develop programs to identify and automate repetitive reporting processes. Formulated Tableau dashboards for presentation to management.

CIBC | TECHNOLOGY SYSTEMS ANALYST

May 2019 – Aug 2019

Tested computer software in CIBC laptop and desktop devices. Assisted the Desktop Imaging team in testing updates before their release using CIBC's OSD Portal to run intermediate versions of the updates on devices. Reported and communicated test result logs to developers.

PROJECTS

Check out my github using links to the projects or my profile!

🔗 STOCK INFO GENERATOR

Python program takes a spreadsheet of 50+ stock tickers and outputs a spreadsheet of info including price, volume, ratings, and more! Options to also include historical price and dividend data with plots. Info is scraped from Yahoo Finance then processed and styled using *pandas*, *openpyxl*, *StyleFrame*. Additional *macros* like live currency conversion are also available to be added.

🔗 AMPL-SQL PROFIT MODEL

AMPL program extracts product, material, machine, and other data from *Access* using *SQL* in an *AMPL .dat* file to build a profit model. A maximum profit production plan is outputted which includes reduced cost of variables, shadow prices, and binding constraints.
